

Trophy Design Competition

steeluniversity.org is a free and innovative e-learning resource focused on all aspects of steel, including steelmaking technology and the multitude of steel applications. This award-winning, on-line initiative is developed and sponsored by the World Steel Association. Each year since 2005, steeluniversity.org has run a **Virtual Steelmaking Challenge** using one or more of the processing simulations available on the website. Participants in the Challenge compete to produce a new grade of steel specially designed for the event. Winners from both industrial and education sectors are invited to attend a prestigious World Steel Association event, at which they are awarded a cash prize and a trophy.

World Steel Association invites entries for creative design of a new Trophy which symbolises the art and science of steelmaking!

Criteria

- The design should be centered around the theme of steel/steelmaking.
- It should be light weight, durable & easy to manufacture.
- It should primarily be made of steel. Other materials if used, should be kept to a minimum.
- There should be a possibility of engraving the name of the recipient of Trophy and year etc. on a small plate.

Terms and Conditions

- By submitting the entries, designers transfer all rights to the World Steel Association.
- A panel of judges will review the entries and the decision will be final.
- Deadline: 12:00 GMT, 15 October 2010
- The design should include 2D & 3D drawings (preferably in electronic format) and assembly instructions (where necessary) as well as material specification.
- Individual and team entries will be accepted - however only one prize per individual/team will be awarded.
